Preface

Genealogy of the direct descendants of WILLIAM HAM who (probably) came from England and settled in Portsmouth, Hampshire, in 1645.

Also Genealogy of the direct descendants of JAMES YOUNG who came from Scotland before 1750. He first settled in Philadelphia, later moving to Barrington, New Hampshire.

No attempt is made to follow the collateral descendants of either family.

It is admitted that the record is not complete, and doubtless there are some errors.

Spaces are left at appropriate places for recording the births of new members of the families. Also the book is interleaved with blank pages.

It is hoped that those who receive this book will keep the records of their branch of the family current, reporting all changes to the author.

THE HAM FAMILY

First known in Portsmouth, N. H. Probably came from England. No attempt is made in this record to follow other than the direct line as shown. It is known that members of this family went to Maine and elsewhere.

1. WILLIAM HAM. — B about 1600. D - Jan. 26, 1672.
Settled permanently in Portsmouth, N. H. 1645. Had grants of land in 1652, 1660 and 1665 of about 160 acres. This land is located about two miles from the B. & M. R.R. station in Portsmouth along the Piscataqua river on the road to Dover Point, called Christian shore. It is near "Cutt's" lane and originally was also called Ham's Point, and later Freeman's Point.
M - Honor — *Stephens*
Children —
2. MATTHEW. — B as early as 1626. D - 1664.
2. ELIZABETH. — B as early as 1628. M - Waterhouse.

2. MATTHEW HAM. — B as early as 1626. D - 1664.
Married —
It is to be noted that Matthew died eight years before his father died, and so he did not inherit his father's property. He had grants of land, acreage not known, adjoining his father's land. So far as is now known he left no will.
Children —

3. THOMAS. — B as early as 1653. Was a mariner. Settled in Rhode Island.
3. WILLIAM. — B as early as 1656. Was executor of his grandfather's will.
3. MATTHEW. — B as early as 1657. Was a cooper (probably making barrels for shipment of cod fish.)
3. JOHN. — B as early as 1660. D - 1731. "The Fisherman" most of his papers are signed "John Ham Fisherman".

3. JOHN HAM. — B - about 1660. D - 1731.

He inherited part of the land in Portsmouth owned by his grandfather, William (1). He also had a grant of land in Barrington, N. H. The town was chartered May 10, 1722. Grants of land in the town of Barrington were made to inhabitants of Portsmouth who had paid "rate's" (taxes) for four years last past and in accordance with such rates. The History of Rockingham and Strafford Counties compiled by D. Hamilton Hurd and published in 1882 lists the "Original Proprietors of the Town of Barrington", and the acreage allotted (Page 608). John Ham is listed as receiving 48 acres.

He left a will and a settlement giving land and property to his sons and daughters and to his son (John Ham 4) rights to the land in Barrington.

Probably was born in Barrington. He settled in Madbury, N. H., buying land from Jonathan Huckins and possibly the house, known later as the "George Berry place". He was a farmer and trader. As there was little currency he made his own currency by giving and taking notes for wood lots, yokes of oxen, etc. These notes were used like checks and cleared through banks.

Married Lydia Tibbets Sept. 28, 1788. She was the daughter of Jeremiah Tibbets who owned a farm in Barrington, a quarter mile from the Madbury line on the Dover to Concord road. After Jeremiah Tibbets died he bought the shares in the estate from the heirs other than his wife, Lydia, and may have moved from Madbury to Barrington. This became the home of the family, passing to Thomas (7) Samuel Caverno (8) George Samuel (9) who sold the farm. At this date (1949) it is known as the Waldron Sportsman Club. The house still stands. The barns and other buildings burned.

THOMAS HAM. — B Dec. 17, 1792. D - Apr. 15, 1871.

Lived on the home farm in Barrington. For many years he was badly crippled with rheumatism (probably now known as arthritis) and was tenderly cared for by his son, Samuel Caverno Ham (8). The new Congregational church in Barrington was built in 1840, financed largely by sale of pews. On Nov. 30, 1840, Thomas Ham bought pew No. 33 for \$49.50. It is in the family at this date.

Married Mary (Polly) Caverno of Strafford, N. H. Oct. 18, 1818. She was born Feb. 4, 1799. Died Apr. 27, 1877.

Children —

- 8. Samuel — B Jan. 21, 1820. D - May 1, 1821.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) and (2) under the conditions (3) and (4). It is shown that the system has a solution if and only if the conditions (5) and (6) are satisfied.

2. In the second part of the paper, the problem of the construction of the solution of the system (1) and (2) is solved. It is shown that the solution can be constructed by the method of successive approximations.

3. In the third part of the paper, the problem of the stability of the solution of the system (1) and (2) is solved. It is shown that the solution is stable if and only if the conditions (7) and (8) are satisfied.

4. In the fourth part of the paper, the problem of the construction of the solution of the system (1) and (2) is solved. It is shown that the solution can be constructed by the method of successive approximations.

5. In the fifth part of the paper, the problem of the stability of the solution of the system (1) and (2) is solved. It is shown that the solution is stable if and only if the conditions (9) and (10) are satisfied.

6. In the sixth part of the paper, the problem of the construction of the solution of the system (1) and (2) is solved. It is shown that the solution can be constructed by the method of successive approximations.

7. In the seventh part of the paper, the problem of the stability of the solution of the system (1) and (2) is solved. It is shown that the solution is stable if and only if the conditions (11) and (12) are satisfied.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β . It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

2. In the second part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

3. In the third part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

4. In the fourth part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

5. In the fifth part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

6. In the sixth part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

7. In the seventh part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

8. In the eighth part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

9. In the ninth part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

10. In the tenth part of the paper the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters α and β is solved. It is shown that the system has solutions for all values of the parameters α and β if the function $f(x)$ is continuous and has a bounded derivative.

Rollins and Sons, Bankers and Brokers of Boston. After a few years in the office he became a salesman, selling a large volume of securities principally throughout New England. He had a most pleasing personality which helped him establish a large number of acquaintances and friends.

After some years he and a few other men of the Rollins firm established a new banking firm, Baker, Ayling and Co., name later changed to Baker, Young and Co. Philip was for many years the directing genius of this firm. He gave to Dartmouth the underground feed electric light system. This was given anonously—no announcement of the donor was made until after his death.

He was a collector of fine antiques. His homes in Boston and Nahant were almost entirely furnished with these antiques. The collection included a noteworthy amount of antique pewter.

Much of this collection was given to Dartmouth by his will.
